

CHITRA DARSHINI K

chitradarshini04@gmail.com | 9113090678 | linkedin.com/in/chitra-darshini-k | Bengaluru, India

PROFESSIONAL SUMMARY

Computer Science & Design graduate with 1.5+ year of experience in enterprise data systems, ML pipeline development, and full-stack engineering. Proficient in Python, SQL, JavaScript, React.js, Node.js, MongoDB, Apache Airflow, Docker, and Workday HCM. Built deep-learning anomaly detection models achieving up to 100% accuracy (ROC-AUC: 1.00) on medical imaging datasets. Certified ServiceNow System Administrator & Application Developer. Seeking Junior AI/ML, Data Science, or Full Stack roles.

TECHNICAL SKILLS

Languages	Python, JavaScript, Java, SQL, C
ML & Data	Scikit-learn, Pandas, NumPy, Convolutional Auto-encoders, Data Pre-processing, Data Visualization, Feature Engineering
Full Stack	React.js, Node.js, Express.js, HTML, CSS, RESTful APIs, MongoDB, MySQL
Data Engineering	Apache Airflow (pipeline orchestration), Docker (containerisation), ETL workflows, data validation & quality checks
Enterprise	Workday HCM (Core HCM, Org Hierarchies, Workforce Data), ServiceNow (Admin & App Dev), Azure
Tools	Git, GitHub, Figma, VS Code, Google Colab, Jira, Confluence

PROFESSIONAL EXPERIENCE

Software Engineer — HR Systems & Data

Feb 2026 – Present

Saks Global | Bengaluru, India

- Maintained and updated 50+ employee records in Workday HCM (Core HCM module) — managing location assignments, org hierarchies, and reporting structures — achieving 99%+ data accuracy across enterprise HR systems.
- Executed workforce data changes and org-hierarchy realignments in Workday, reducing data-discrepancy turnaround time by 30% through systematic validation and quality-check workflows.

Associate Software Engineer (Intern)

Jan 2025 – Jan 2026

Saks Global | Bengaluru, India

- Orchestrated HR and Finance data pipelines using Apache Airflow, automating multi-step ETL workflows and reducing manual processing overhead — improving pipeline throughput and schedule reliability.
- Deployed and maintained containerised enterprise services using Docker, supporting API integrations and ensuring consistent environments across development and production systems.

Machine Learning Intern

Jul 2023 – Aug 2023

Siemens | Bengaluru, India

- Engineered a Python-based computer vision pipeline for automated 3D-printing defect detection, capturing and analysing multi-angle images to identify surface anomalies with high precision.
- Built a comparative-analysis module against a reference database, improving defect-detection accuracy and reducing material waste — pipeline was adopted by the team for ongoing quality assurance.

KEY PROJECTS

Anomaly Detection in Medical Imaging | Python · Convolutional Auto-encoders · Scikit-learn · ROC-AUC

- Designed and trained a deep-learning anomaly detection pipeline using Convolutional Auto-encoders across MRI, CT, and X-ray modalities — processing 500+ medical images with end-to-end pre-processing and reconstruction-error analysis.
- Achieved 87.25% accuracy on Brain Tumor detection (ROC-AUC: 0.99) and 100% accuracy on Lung Cancer detection (ROC-AUC: 1.00), evaluated using Confusion Matrix, Recall, Precision, and F1-Score.

Real Estate Management Platform | React.js · Node.js · Express.js · MongoDB · RESTful APIs

- Built a full-stack MERN platform with RESTful CRUD APIs for property, user, and transaction management; designed responsive React components for search, filtering, and listing — optimised MongoDB data retrieval for scalable performance.

CERTIFICATIONS & EDUCATION

Certifications

- Certified System Administrator – ServiceNow
- Certified Application Developer – ServiceNow
- Machine Learning with Python – Great Learning

Education

B.E. Computer Science & Design — CGPA 9.31/10

Dayananda Sagar College of Engineering | Dec 2021 – Jul 2025

Class 12 (CBSE) — 91.2%

Sri Chaitanya Techno School | 2021
